**FENIX SDN BHD**

SOUTHEAST ASIA SOLE DISTRIBUTOR

## What we can do for the future.

Our company is thoroughly consumer-oriented in all areas of life. We aim to be a company that contributes to society by solving the wishes of being more convenient, more fashionable, more delicious, healthier, and by producing a richer amenity life, while actively work to protect the global environment.

# As a manufacturing company, we contribute to the creation of a new society.

We will further promote the manufacture of environmentally friendly products and are actively working towards the Sustainable Development Goals (SDGs) set forth by the member states of the United Nations.

WOOD

from

ECO EKCO

Traceability of paper and wood products

To be a company with responsible forest management, we will promote a forest certification system that uses wood harvested from properly managed forests. We are committed to ensure traceability of paper and wood products throughout production, distribution, and delivery to consumers.

FSC® C081864  
Responsible Forest Management Mark

PEFC  
Product Group  
MANAGED FOREST

Towards forest-certified products  
Made from FSC®-certified materials, recycled resources, and other responsibly managed raw materials.

EVALUATION

Paperboard produced from certified forests

EVALUATION

Socially, economically and environmentally well-managed forests

Audited by forest certification body

Certification number  
K1602321

Thinning wood mark certification obtained

The Thinned Wood Mark promotes the importance of thinning and the use of thinned wood. By ensuring the proper use of this mark on products made from thinned wood, it helps raise awareness, encourage its utilization, and support consumer choices. (Use is limited to EC wear)

SOIL

from

ECO EKCO

Aluminium manufacturing and recycling process

Aluminium products can be recycled repeatedly into new aluminium products. When the same type of aluminium alloy is collected and melted down, it produces recycled metal of the same quality as new material. From an environmental perspective, we promote a sustainable recycling system that makes effective use of limited resources.

<Same quality>

New bullion

Alumina

Bauxite

SCRAPS

from

ECO EKCO

Recycling of paper product waste

We are also actively working to reduce and recycle waste generated from our factories. Scrap materials generated during the manufacturing process of paper containers are sent to paper factories and reproduced into toilet paper and tissue paper.

Reborn as household paper that supports our daily lives.

Melted raw material processed into base paper.

Delivered to the paper mill, melted, and reused as raw material.

Scraps are compressed and packed for easy transportation.

Scraps generated during the manufacturing of paper containers.

## ABOUT US

Fenix Sdn. Bhd. was established with a commitment to quality and reliability, evolving into a reputable trading and distribution partner for both domestic and international markets. Over the years, Fenix robust relationships across various industries, providing not only products but also long-term solutions.

We are honored to serve as the exclusive distributor of Toyo Aluminium Ekco in Southeast Asia, delivering premium household products, Japanese including aluminium and foil parchment paper, to both residential and commercial clients. Additionally, our distribution network encompasses a diverse array of essential packaging materials, such as cartons boxes, hand tape, and stretch wrap, effectively serving clients across multiple sectors, particularly within the United States and Asia markets.

## OUR MISSION

To deliver value beyond products — combining quality, consistency, and service — while fostering meaningful partnerships that grow together with us.

## OUR VISION

To be the preferred choice in the household and packaging solutions industry, known for integrity, innovation, and customer-centric service.

## OUR PARTNERS

Toyo Aluminium Ekco Products Co., Ltd — Exclusive distribution rights in Malaysia

Global trading network supplying the U.S. and Asia.

# WHAT WE DO

01

EXCLUSIVE  
DISTRIBUTION

Partnering with top global brands like Toyo Aluminium Ekco to ensure high-quality products for household and industrial use.

02

GLOBAL  
TRADING

Exporting and supplying packaging essentials such as carton boxes, industrial cling wrap, and hand tape.

03

E-COMMERCE  
GROWTH

Currently expanding into digital platforms to better serve modern retail and wholesale demands. Our aim is to make reliable household and packaging products accessible with just a few clicks.

### <Lid material indication>

<PET>	A-PET
<PS>	OPS
<PP>	PP
<AL>	Aluminium

### <Notes on measurement>

Paper containers may vary in millimetres due to the texture of the material.  
The measurements of the products may differ slightly between the displayed and the actual product.

### <Material and specs. of paper container>

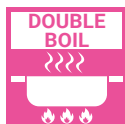

Paper cups	Paper + Resin (PET)
Foldable paper package	Paper + Resin (PET)
EC ware	Paper + Resin (PBT Laminate)

Before freezing, test thoroughly with the actual environment, ingredients, and storage conditions. Aluminium containers may corrode from acids and salts.

Cooking is only possible in a temperature-controlled oven, not over an open flame or in a toaster oven. Test with actual ingredients beforehand.

When cooking in an aluminium container, steam and water minerals may cause discolouration due to surface oxidation. This is harmless and safe for consumption.

\*Material: Aluminium foil

## Precautions for handling cooking foil

- (1) When wrapping foods with strong acidity or salt content such as pickled plums, miso, or soy sauce for long periods, corrosion or perforation may occur.
- (2) When using for baking or similar applications, avoid direct contact with flames as it may melt. Use utensils or other equipment to place it on top.
- (3) Discoloration may occur if stored in a humid place or exposed to moisture.
- (4) Before using cooking foil in a microwave, please check the user manual of the microwave used in kitchens, stores, or households.

## クッキングシート

\*Material: Grease-resistant paper with silicone coating on both sides

# 詰替用クッキングシート

Refillable cooking sheet. Handy for oven, microwave, and steaming. Able to prepare the ingredients cleanly.

①

For instructions on how to use the refill cooking sheet and handling precautions, please refer to the product packaging or contact your sales representative.

Product	Denomination	Width x Length	Qty. per case
No.	Refill cooking sheet		pcs/case
① S0271	Refill cooking sheet - 33cm x 20m refill roll	33x20	30

\*Material: Grease-resistant paper with silicone coating on both sides

## Precautions for handling cooking sheet

- (1) Do not use over direct flame or at 250°C for more than 20 minutes, as it may catch fire.
- (2) When using in a toaster oven, the sheet may touch the heating element, causing it to burn or produce smoke. Please follow the instructions in your toaster oven's manual and observe the following precautions.
  - Always use a baking tray and do not let the sheet hang over the edges.
  - Do not cover food with the sheet.
  - Do not use the sheet to wrap food for baking.

# Non-Corrosion Al. Foil Roll

**Toyalfoil™ — New Alloy, Toyo owns new technology: “Non-Corrosion” Foil**

## Highlights:

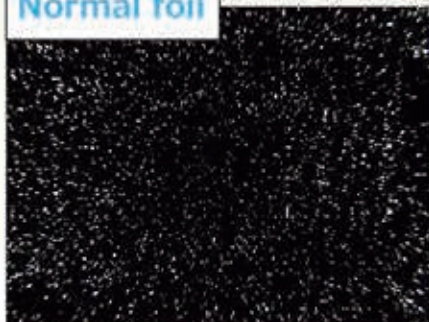

- Excellent corrosion resistance to pitting caused by salt water
- Excellent corrosion resistance to moisture corrosion

## Corrosion Resistance Evaluation:

corrosion  
resistance

Pitting corrosion by  
salt water

Normal foil

Multiple pitting occurs

New Alloy Toyalfoil™

Minimizes pitting corrosion occurrence

《評価方法》

- ・孔食促進液{3%(NaCl+酢酸)aq, 35℃}中に100hr浸漬後、孔食発生状況評価(光透過法)。

White corrosion by  
hot and humid air

Normal foil

White corrosion occurs  
within 17 to 27 days

New Alloy Toyalfoil™

No corrosion even after 60 days  
(still ongoing)

《評価方法》

- ・40℃75%雰囲気中で加速試験
- ・検定期間: 27日間

※ 同耐食クッキングホイルは、60日経過後腐食発生。A6011対比2倍以上の耐食性を有している事を確認(当社調べ)

## Why is Toyalfoil special?

1. Toyalfoil helps to reduce oxidation and corrosion in all aluminum products.
2. Longer shelf life even in hot and humid environments.

		
Product Name	Toyalfoil™ (Moisture & Salt Resistant) 8m	Toyalfoil™ (Moisture & Salt Resistant) 200m
Product Code	S0235	S0240
JAN Code	4901987202356	4901987202400
Face Size	44 × 314 × 44 mm	110 × 337 × 110 mm
Product Size	13μ × 300 mm × 8 m	13μ × 300 mm × 200 m
Product Weight	Approx. 150 g	Approx. 2,300 g
Quantity per Case	30	1
Case Size	320 × 280 × 234 mm	Same as product (81 pcs per pallet for shipping)
Country of Origin	China	China

# Green Aluminium

30cm×150M

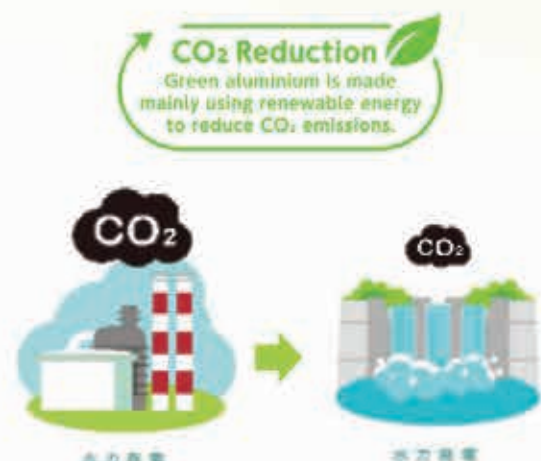

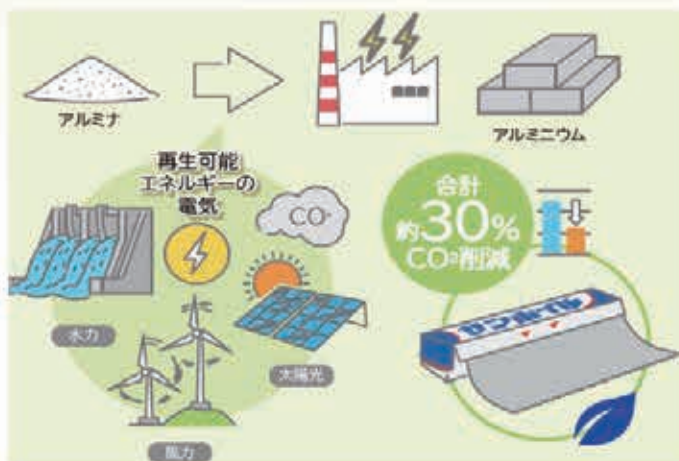

30cm×8M

## Reduction of CO<sub>2</sub> Emissions:

Aluminum is extracted by “electrolysis,” which consumes a large amount of electricity.

Depending on the electricity generation method used, CO<sub>2</sub> emissions can vary significantly and are a major contributor to global warming.

- Normal Al. CO<sub>2</sub> emissions: **1MT of Al. → 9.24MT**
- **Green Al.** CO<sub>2</sub> emissions: **1MT of Al. → 4.00MT**

**Green Al. can reduce CO<sub>2</sub> emissions by over 57% compared to normal aluminum.**
